What Big Screen Keys is Designed to Do

Big Screen Keys is an on-screen keyboard designed to help individuals who find using a keyboard difficult or impossible. By clicking the on-screen keyboard keys, Big Screen Keys will type to the active window. Big Screen Keys can also be resized to quickly adjust to the user's needs.

System Requirements

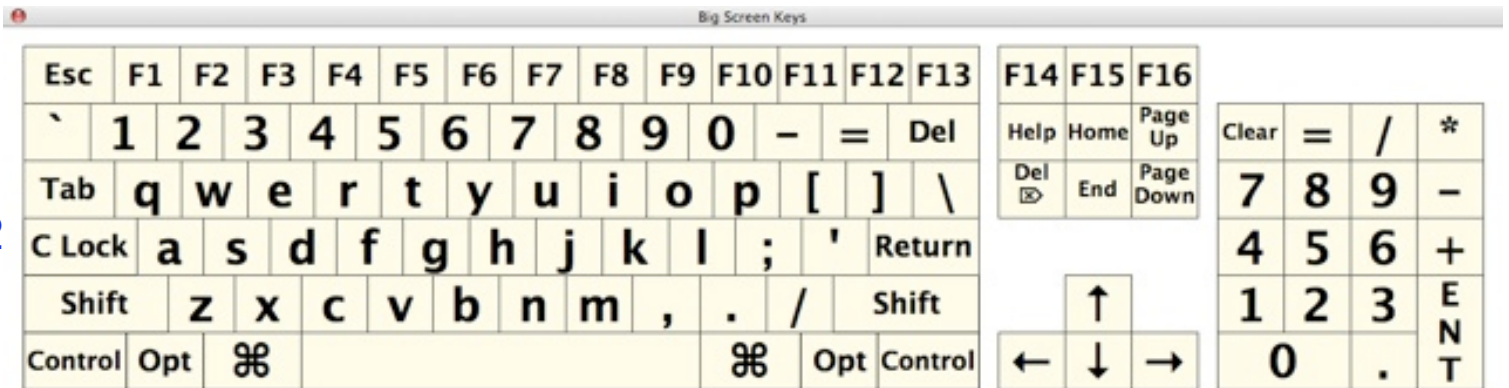

Mac OS 10.2.x or Greater
PowerPC G3 233 MHz CPU/Intel CPU
128 MB RAM
20 MB Free Hard Drive Space
640x480 Screen Resolution
Speakers

Installing Big Screen Keys

1. Read the End User Licensing Agreement (EULA). If you find the terms acceptable then proceed to Step 2.
2. Download the Big Screen Keys dmg file from SchoolFreeware.com.
3. If the disk image is not automatically mounted, double-click on the file and then double-click on the mounted disk image.
4. Place the Big Screen Keys folder and its contents in the Applications folder of your hard drive.
5. If you wish, drag the Big Screen Keys application to the Dock.
6. Big Screen Keys is now ready to be used.

User Interface

1

2

1. The red dot (close button) in the upper-right corner of the window quits Big Screen Keys.

2. Once Big Screen Keys is run, the user will click on the area that the user wants to start typing. Each key can be clicked on by a mouse or other pointer device. The modifier keys (Command, Control, Shift, Option) when clicked, will turn red indicating that key is active. Once a non-modifier key, with exception of caps lock, is pressed the active modifier key(s) will turn off.

3. By click and hold on the resize handle and moving the mouse or other pointer device, Big Screen Keys can be resized.

Note: When using Big Screen Keys please make sure that the caps-lock is off on the computer's keyboard. This will prevent the caps-lock from making Big Screen Keys type in all caps.

3

Keyboard Shortcuts

If Big Screen Keys is the active window, then, Command Q will quit the program. If another program is active, then, the red close button will have to be clicked to close the program.

Quit.....Command Q
